

CUSTOM SOLUTIONS:

Maximize your organization's results with proven techniques

Developing effective leaders and teams is crucial for maximizing your organization's resources and producing world-class results. One of the best ways for your team to meet and surpass its goals and objectives is to participate in one of our custom-designed programs tailored just for you.

CUSTOM OFFSITE PROGRAMS

Optimize your team's leadership skills.

The Bell Leadership team will work with you to determine the right location and setting that will allow your team to be “in the moment” and focus on the selected topics. We will create an interactive, “hands-on” session that will get you out of your seat: moving, connecting with team members and building relationships that go beyond surface-level chit chat. Our team provides a well-paced mixture of activities and breakout conversations with short bursts of presentation, examples and illustrations from the front of the room, using flip charts rather than PowerPoint. We will work with your team to develop the necessary action plan and next steps customized to your needs using powerful, practical leadership principles.

STRATEGIC PLANNING

Focused facilitation to gain clarity, consensus and commitment.

A repeated refrain from many leaders is that their work days are focused on “putting out fires.” By leveraging Strategic Planning with an experienced trainer from Bell Leadership, you and your team will take the time to be proactive. Together, we will build a plan to pivot and focus on the work that will lead to future success.

We will lead you through a detailed analysis of the changes, problems, opportunities and needs of the external environment to which your company must adapt. This analysis is based on all relevant factors, including the company's mission, vision, core values, internal strengths and weaknesses; the competitive marketplace and economic conditions and goals. We will then focus on the actual work to be done, including the organizational structure and human systems required to achieve the desired goals. Finally, you will leave with an implementation plan that you and your team are ready to execute with confidence, having established clarity, consensus and commitment.
